Contemporary Approaches to Research in Mathematics, Science, Health and Environmental Education Symposium

Monday 23-Wednesday 25 November 2020, 9.00 am—1.00 pm

The symposium will focus on practical and theoretical aspects of research methodology. It follows the highly successful symposia held annually from 1993 to 2005 and again from 2010 to 2019, in which methodological techniques and issues (such as socio-cultural perspectives, productive use of quantitative data, collaborative practitioner research designs, analysing discourse) have been discussed in a lively, informal setting.

It is expected that academic researchers and higher degree by research students will benefit from attending.

Keynote speakers

Michael Tan

National Institute of
Education, Singapore

Jill Brown

Deakin University

Registration

Attendance at this symposium is **free**. Registration is essential to access the program.

Register online at: bit.ly/CAR2020Registration

Submit an abstract

If you are interested in presenting at this symposium please register your expression of interest before Friday 2 October 2020 on the [Re-Imagining Futures in STEME](https://deakinSTEME.org) website (deakinSTEME.org), which provides online submission.

Presenters will be invited to submit a chapter for the Contemporary Approaches to Research Symposium book series.

Each presentation should be 10-15 minutes in duration. It should briefly outline the research question being addressed and may include the findings or likely outcomes of the research, but should focus mainly on the research methodology.

Reports on work in progress are welcome.
