Australian Teacher Education Association

Australian Catholic University, North Sydney, Hosts 2023 ATEA Conference

Wednesday 12th July 2023 - Friday 14th July 2023.

ATEA ANNUAL CONFERENCE RETURNS TO FACE-TO-FACE

The 2023 conference marks the return to face-to-face peer engagement, after a lengthy hiatus. Hosted by ACU, the theme is **'Embracing Partnerships: Leading the Future of Teaching, Learning and Research'**.

Teacher Education increasingly relies on collaborative partnerships to transform innovative teaching, learning, professional practice and research. This conference theme recognises the broad range of partnerships across multiple contexts that contribute to innovative teaching, learning, professional practice and research activities in preparing and educating teachers. The conference discussions will focus on the multiplicity of innovative collaborative partnerships across teacher education contexts, in particular those within university, educational system, school, community, government, and industry spaces, and the interweaving of these perspectives.

ATEA welcomes [Professor Matthew Clarke](#) (left), from the University of Aberdeen, Scotland, as the opening Keynote Speaker. Matthew Clarke has previously worked in teacher education at universities in Australia, England, Hong Kong and the United Arab Emirates, and has taught in schools in England and Australia. His research interests focus on education policy and politics, particularly their implications for teachers and teacher educators. More Keynote speakers to be announced.

2023 ATEA Initiative

In the spirit of the conference theme of partnerships, ATEA would like to recognise the importance of school-based teacher educators in partnerships. On the final day of the conference, there will be a special Teacher Stream. The Teacher Stream celebrates the role that school-based teacher educators play in teaching and learning, research, well-being, community engagement or any other relationship that contributes to the education of current and future teachers. ATEA welcomes a broad range of school-based teacher educators, including teachers who mentor pre-service teachers, deliver professional learning, work across universities and schools and have conducted research in the field. The one-day Teacher Stream will provide school-based teacher educators with a platform to share their research, experiences, and innovative practices.
